

**Schedule 7**  
**Certification Requirements**

Each Licensed User is required to obtain end user certification from EFETnet prior to commencement of the operation of the EFETnet Software in the production environment:

- for each or any installation of the EFETnet Software
- for each or any Business Process Module Components or other defined message sets for which EFETnet certification is available
- for each major Upgrade to the EFETnet Software or individual Business Process Module Component
- for any significant change to software linked to or used in the same technical environment as the EFETnet Software which might impact the certified status of the EFETnet Software since it was last certified.

Each Licensed User is required to obtain evidence of current valid certification of the software product from the vendor of the product for the applicable version of the EFET Standards.
