

## EFETnet offers Community Support Features

**EFETnet** members form a community of energy traders and brokers who use the **EFET Box** for electronic confirmation matching (eCM), position matching (ePM) and other post-deal processes. To facilitate collaboration between users, Ponton has developed additional community functions: [www.community.efetnet.org](http://www.community.efetnet.org).

The screenshot shows a user interface for the EFETnet Community Service. It includes a navigation menu on the left with sections like 'Main', 'Info Areas', and 'AdminGuide'. The main content area features a welcome message, a 'News' section with recent updates, an 'Events' section for upcoming training, and a 'Latest Knowledge Base Entries' section with recent articles.

EFETnet Community Services	EFET Box Community Extensions	Central Data Distribution
----------------------------	-------------------------------	---------------------------

<p>The <b>EFETnet Community Services</b> are available for EFET Box users to facilitate information distribution and direct communication:</p> <ul style="list-style-type: none"> <li>The <b>Knowledge Base</b> holds information about installing and maintaining the EFET Box, a FAQ list, information on Errors and back-end integration.</li> <li>The <b>Forum</b> is used by EFETnet users to discuss standards-related questions, to announce down-times of their systems or to directly ask questions to their peers.</li> <li>The <b>Library</b> holds documents and manuals for the different EFET Box modules (eSM, ePM, etc.) and usage phases (implementation, test, operation).</li> <li><b>Download Service:</b> Releases of the EFET Box and different plug-ins are available here. New releases and patches are uploaded by Ponton.</li> <li>The <b>News</b> page keeps EFET Box users up to date on EFETnet, software development, and the community itself.</li> <li><b>Events</b> such as conferences and EFET Box trainings are announced via the Community Service.</li> </ul>	<p><b>Box Chat:</b> The EFET Box reduces manual matching to a small share of all confirmations. Less than 3% will still have discrepancies in most cases. To further support the reconciliation process, Ponton developed Box Chat: Back-office user of one counterparty can directly talk to the other side in a secure and audited way without using an external chat server. The chat channel is available for every back-office user who has access to the EFET Box.</p> <p><b>Box Ping:</b> Information on the live status of the counterparty boxes:</p> <table border="1" style="width: 100%; text-align: center; border-collapse: collapse;"> <tr> <td></td> <td>15:42</td> <td>14:42</td> <td>13:42</td> <td>12:42</td> <td>11:42</td> <td>10:42</td> <td>09:42</td> </tr> <tr> <td>11XPASO-----K</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>11XPONTONTRADERF</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>11XPONTONTRADERQ</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>11XRWETRADING--0</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>60XCOYOTE-----X</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>BR0SE</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>BRSE3</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>darius</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>server01</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> <tr> <td>server03</td> <td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td><td>●</td> </tr> </table> <p><i>Sample Output of the Box Ping Function</i></p> <p><b>Box Login to Community Pages:</b> Whenever logged-in to the EFET Box, users are authorized to directly access the community Services as well without an additional password entry procedure.</p>		15:42	14:42	13:42	12:42	11:42	10:42	09:42	11XPASO-----K	●	●	●	●	●	●	●	11XPONTONTRADERF	●	●	●	●	●	●	●	11XPONTONTRADERQ	●	●	●	●	●	●	●	11XRWETRADING--0	●	●	●	●	●	●	●	60XCOYOTE-----X	●	●	●	●	●	●	●	BR0SE	●	●	●	●	●	●	●	BRSE3	●	●	●	●	●	●	●	darius	●	●	●	●	●	●	●	server01	●	●	●	●	●	●	●	server03	●	●	●	●	●	●	●	<p>The <b>Central Database</b> of the Community Services is used to maintain and to distribute:</p> <ul style="list-style-type: none"> <li><b>Static Data:</b> Information on agreements, EIC codes, Broker Codes, Commodity References, Hub Codes, etc. is centrally maintained and can be downloaded automatically as report or XML data. For each data item, a valid time span is given.</li> <li><b>Member Information:</b> For each EFETnet member, organization data is available online (addresses, contacts).</li> <li><b>Live Status:</b> who is live with which products and on which markets.</li> </ul> <p><b>Current and future EFET Box processes</b></p> <ul style="list-style-type: none"> <li><b>eCM</b> (electronic Confirmation Matching): live since 2004, matches deal confirmations for physical and financial products.</li> <li><b>ePM</b> (Electronic position matching): live since 2007, periodic reconciliation of position data at summary and detail level.</li> <li><b>eFM:</b> Fax-related document processing with outbound confirmation to fax conversion and OCR scanning and matching of incoming fax documents.</li> <li><b>eSM</b> (electronic Settlement Matching): matches invoices and netting statements for physical and financial products; planned for release Q1 2009.</li> </ul>
